OBJECTIVE

To contribute effectively to a progressive organization by applying my technical knowledge, analytical abilities, and leadership skills, while embracing new challenges and opportunities for growth.

EXPERIENCE

Maeko Tech Solution LLP | Software Developer December 2023 – Present

- Working as a contractor with **Skyworks** as part of the **Middleware Team**, supporting enterprise integration and data workflows.
- Developed and maintained Azure Data Factory (ADF) pipelines for data transfer, transformation, and integration between Azure SQL and MSSQL/ODS databases.
- Worked with Azure Portal, Logic Apps, and API Management (APIM) for enterprise application integration and backend workflows.
- Lead development of Android applications using Java and Kotlin, focusing on enterprise-grade solutions like the AMS (Attendance Management System).
- Implemented complex Offline-First architecture using SQLite, ensuring seamless data synchronization once internet connectivity is restored.
- Developed core modules for location tracking, automated QR scanning, and attendance logging using Volley for API integrations.
- Utilized Python (Django) for backend logic and data structure optimization for mobile-to-server communication.
- Designed and maintained responsive web interfaces using HTML5, CSS3, and JavaScript.

SKILLS

- **Languages**: Java, Python, PHP, JavaScript, SQL.
- **Cloud & Data Integration**: Azure Data Factory (**ADF**), Azure Portal, Azure Logic Apps, Azure API Management (**APIM**).
- **Mobile Development**: Android Studio, SQLite, Volley.
- **Web Development**: Django, Laravel, HTML5, CSS3.
- **Tools**: Figma (UI/UX Design), GitHub,Postman VS Code.

PROJECTS

Skyworks – Middleware & Data Integration Platform

Role: Middleware / Azure Developer (Contractor)

- Developed and maintained Azure Data Factory (ADF) pipelines for data integration and transfer between Azure SQL, MSSQL, and ODS databases.
- Designed and monitored data workflows using ADF pipelines, datasets, linked services, and triggers.
- Worked with Azure Logic Apps to develop and maintain enterprise integration workflows and automate backend processes.
- Developed and configured Azure API Management (APIM) APIs for exposing backend services and stored procedures through secure REST endpoints.
- Worked with Azure Portal for deployment, configuration, monitoring, troubleshooting, and managing cloud resources.
- Integrated APIs with SQL databases and implemented data transformation, validation, and error-handling workflows.
- Troubleshot production and QA issues related to ADF pipelines, Logic Apps, APIM APIs, SQL queries, and data transfers.
- Collaborated with the Middleware team to resolve production tickets and support application and data integration requirements.

AMS QR (Attendance Management System) | Android App

- Developed an end-to-end attendance system featuring QR code scanning and background data synchronization.

AMS FACE (Attendance Management System) | Android App

- Currently implementing a face recognition feature to mark attendance.

Kansara Nayati | Web & Android Application

- Designed a community information platform using PHP Laravel and MySQL, providing real-time data access for community members.

Divyesh Jain

9784587133 | divyeshgandhi2000@gmail.com

Sakal | School Management System
- Building an Android teacher app to mark attendance and upload student information for class teachers.

Saathi
- Working on enhancements as per client requirements.

Gurukul Template | Web App
- Created a template-based image generation tool allowing users to customize posters, certificates, and event creatives, add text/images, and export high-quality downloadable graphics.

EDUCATION

MCA (Master of Computer Applications) | Mohan Lal Sukhadia University, Udaipur(2023) – 7.76 CGPA

- **B.Sc.** | Bhupal Nobles' University, Udaipur(2021) – 66.51%
- **12th** | Mahaveer Public Sr. Sec. School, Rishabhdeo(2018)-71.6%
- **10th** | Mahaveer Public Sr. Sec. School, Rishabhdeo(2018)- 7.8 CGPA

CERTIFICATIONS

- Django Full Stack Development – Udemy
